

## Conference: A Christian Response to Climate Change

# Timetable and Programme

St Michael's Church, 5 rue d'Aguesseau, Paris Saturday 5 December 2015 (day and evening)

Free event - contributions welcome - online registration strongly advised

arocha.org/COP21/conference

(nearest metro stations are Condorde and Madeleine on the lines 1, 8, 12, 14 or Miromesnil on the lines 9 and 13)

Time	Activity	Speaker name	Title
9:15-9:30	Introduction	(FR / EN)	Welcome and Presentations
9:30-10:15	Speaker 1	Dr. Antoine Bret (FR)	Can climate science be trusted?
10:15-11:00	Speaker 2	Dr Jean-François Mouhot (FR)	Climate Chains: The parallel between historical slavery and energy slavery
11:00-11:30	Coffee break		
11:30-12:15	Speaker 3	Dr Dominic Roser (EN)	Bringing Justice to a Hotter World
12:15-13:00	Speaker 4	Rev. Dave Bookless (EN)	The Bible and Climate
13:00-14:30	Lunch break		
14:30-15:45	Workshops	Paul Hege (FR)	Environmentally responsible local churches
		Max Boegli (FR)	Climate Change — Signs of Hope
		Dr Chris Walley (EN)	God, Climate and Geology
		Dr Antoine Bret (FR)	Can climate science be trusted - discussion
		Rev. Dave Bookless (EN)	The Bible and Climate - discussion
15:45-16:15	Coffee break		
16:15-17:00	Speaker 5	Bishop Efraim Tendero with Rachel Hauser (EN)	Facing Climate Change as a daily Reality: Christian Perspectives from the Philippines
17:00-17:15	Speaker 6	Kuki Rokhum and Lowell Bliss (EN)	The Lausanne Movement and Climate Change: Cape Town Commitment, Jamaica Call to Action, and Global Campaign
17:15-18:00	Plenary session		
18:00-19:30	Dinner break		
19:30-20:00	Various	(FR / EN)	Welcome, videos, opening prayer and music group
20:00-20:45	Speaker 7	Bishop Efraim Tendero (EN)	The Gospel and the Climate: Climate Change as a Global Issue for Evangelicals
20:45-21:30	Speaker 8	Dr Katharine Hayhoe (EN)	A climate for change
21:30-22:00	Plenary session	Efraim Tendero and Katharine Hayhoe – Chair: Dave Bookless (EN)	
22:00-22:05	Benediction. Formal close		

## Programme

Introduction: 9:15-9:30

Speaker 1: 9:30-10:15

Dr. Antoine Bret

Associate Professor, Universidad Castilla-La Mancha, Spain

Title: Can climate science be trusted? (in French with simultaneous translation)

Abstract: On the occasion of COP21 many Christian leaders are taking action in relation to climate change, which is increasingly being seen as a question of social justice. Pope Francis has just published an encyclical on this subject; the Pax Christi network is taking action on climate matters; the Protestant Federation of France has just published a text and is calling on its members to take part in the 'climate fast'; the French National Council of the WEA has also just distributed a declaration by the Protestant Evangelical Ethics

Committee calling for a reduction in greenhouse gas emissions. But many Christians are still sceptical: can one really trust climate science? Even if there is warming, is it really caused by human activity? This presentation will tackle the underlying physics and observations in relation to these two questions and try to explain why the scientific community is no longer divided on these things, even if the general public is.

Speaker biography: Antoine is a physicist and a Professor at the University of Castilla–La Mancha at Ciudad Real, Spain. His first degree in electrical engineering (1991) was from the prestigious Supelec institution. His Physics Doctorate (1994) was gained at Orsay University where he also taught. His area of expertise is plasma physics theory and its applications in thermonuclear fusion and astrophysics. He was a Visiting Scholar in the Astrophysics Department at Harvard University in 2012 and 2014. He is the author of a book resulting from 10 years of university teaching on energy and climate questions: 'The Energy–Climate Continuum: Lessons from Basic Science and History'. He has also worked for a French evangelical church and was a pastor in Madrid for one year.

Speaker 2: 10:15-11:00

Dr Jean-François Mouhot

Director, Les Courmettes, A Rocha France

Title: Climate Chains: The parallel between historical slavery and energy slavery (in French with simultaneous translation)

Abstract: History can offer many insights into our current climate crisis. What I do today with my 'energy slaves' (machines that work for us) is not very different from what slaveowners of the past did with their slaves. I will draw on this modern parable to see what our Christian response should be to the challenge of climate change.

Speaker biography: Jean-François was trained as an environmental historian and worked as a researcher in universities in France, the UK and US. He has written a book and several articles on climate change issues. His desire to serve his Lord Jesus Christ and to be a witness for creation care led him to join A Rocha in June 2014.

Coffee break: 11:00-11:30

Speaker 3: 11:30-12:15

#### Dr Dominic Roser

James Martin Fellow, Oxford Martin School, University of Oxford

Title: Bringing Justice to a Hotter World

Abstract: Climate change is not only a scientific and a political issue. It is at heart a moral issue. Unfortunately, our moral conscience developed its sense of right and wrong mostly for small-scale, personal interactions rather than for global, long-term challenges such as climate change. Climate change thus presents us with unprecedented and unfamiliar questions of justice. We therefore need to ask: How can we make lifestyle and policy choices that allow not only ourselves to flourish, but also our sisters and brothers across the globe, our own grandchildren, and our fellow creatures from the animal kingdom?

Speaker biography: Dominic Roser is a political theorist at the University of Oxford and also the Nanjing University of Information Science and Technology. His research focuses on the ethics of climate change. This includes issues such as intergenerational justice, global justice, the ethics of risk, human rights, and the normative foundations of climate economics. He co-authored an introductory book on climate ethics which is available in German and soon also in English. He belongs to an Anglican church and has been active in various Christian political initiatives in Switzerland.

Speaker 4: 12:15-13:00

Reverend Dave Bookless

Director of Theology for A Rocha International

Title: The Bible and the Climate

Abstract: What does it mean to say 'Jesus is Lord!' in a time of Climate Change? The Bible was written before humanity's impact on the environment was global, so how can we relate such an ancient text to such a modern problem? What does the Bible have to say more broadly about humanity's place within nature and our God-given responsibilities to the earth.

Speaker biography: Dave has worked with A Rocha since 1997, first as an International Trustee, then from 2001 with A Rocha UK as co-founder (with his wife Anne), National Director, and then Director for Theology, Churches & Sustainable Communities. He joined the A Rocha International team in September 2011. His role as Advisor for Theology and Churches includes providing advice and resources for ARI's Trustees, Team and national A Rocha organisations, and coordinating liaison with international theological and mission networks and organisations. He is also studying for a part-time PhD at Cambridge University on biblical theology and biodiversity conservation.

Lunch break: 13:00-14:30

#### Workshops: 14:30-15:45

Workshop 1

## Paul Hege

Environmental advisor to Emmaeus Deaconesses and Domaine de l'Emmanuel Association

Title: Environmentally responsible local churches (in French with simultaneous translation)

Abstract: The local church is a good place to raise awareness, act and make a relevant Christian contribution to discussions on the environment, climate, etc. We can do this by:

• giving proper weight to creation in teaching (sermons, Bible studies, children's activities, Sunday school ...)

- developing a sense of gratitude in the church for the wonders of creation, including the unique place God has given to humans, with the ability and the mandate to understand and act (thanksgiving celebrations, church visits to Les Courmettes or other similar sites, whether Christian or not)
- integrating creation care activities into the life of the church, such as: thinking about the buildings, heating, lighting, simple church meals, using local and/or organic products, not wasting food and not using disposable crockery, a 'Walk to Church Sunday', a church community garden ...

Speaker biography: Following engineering studies , Paul Hege worked in industry then in technical education. In 2011–2012 he studied for and gained an Environmental Advisors Masters at INSA in Strasbourg and now advises medical and social welfare institutions on more environmentally responsible operations. He is also a member of the pastoral team of the Mennonite church in Strasbourg.

Dr. Max Boegli

Swiss Electronics and Microtechnology Centre, Neuchâtel, Switzerland

Title: Climate Change – Signs of Hope (in French with simultaneous translation)

Abstract: By going back to our Christian roots and listening to our Catholic and Orthodox brothers, we will attempt to discover rays of hope which can be markers for our lives in times of crisis and climate change.

Particular attention will be paid to the natural rhythms of life using the Trinity as a guide: Father, Son and Holy Spirit.

Speaker biography: Max Boegli is an electrical engineer with a doctorate in analysis and monitoring of dynamic systems. He was active for several years in humanitarian work including telecommunications in conflict zones and demining of antipersonnel mines. Touched by the gospel message, he has worked in particular with school and university Christian Unions in French-speaking Switzerland.

Max currently works in the field of renewable energy and in research and development of 'clean' and sustainable technologies. He is involved in A Rocha Switzerland in raising climate change awareness and our role as Christians.

### **Dr Chris Walley**

Mediterranean Science and Conservation Projects Coordinator, A Rocha International

Title: God, geology and climate

Abstract: Geological science is now beginning to unravel the long and complicated history of the Earth's climatic changes, which includes both ice ages and long episodes of high temperatures. This workshop will discuss in simple terms how we know the temperatures of the past and outline how we believe that these have changed over time. We will then discuss how this information can be applied to our concerns over climate change and how Christians should view this.

Speaker biography: Chris has worked for 40 years as a professional geologist, during which time he has been an oil company consultant, an academic researcher and a college lecturer. He has also written a number of popular theological books including *The Life, a Portrait of Jesus* with the evangelist J John, which has sold over 150,000 copies.

Workshop 4

#### Dr. Antoine Bret

Associate Professor, Universidad Castilla-La Mancha, Spain

Title: Can climate science be trusted? – discussion (in French with simultaneous translation)

An opportunity to explore further the topics raised in Antoine's earlier talk.

Workshop 5

#### **Reverend Dave Bookless**

Director of Theology for A Rocha International

Title: The Bible and the Climate - discussion

An opportunity to explore further the topics raised in Dave's earlier talk.

Coffee break: 15:45-16:15

Speaker 5: 16:15–17:00

Bishop Efraim Tendero

Secretary General, World Evangelical Alliance

With Rachel Hauser - Servants team, Manilla

Title: Facing Climate Change as a daily Reality: Christian Perspectives from the Philippines

Abstract: The Philippines now suffers more than 20 cyclones each year, leading to increasing landslides, rainfall, poverty and death. We will hear how evangelical Christians are working both amongst the poorest communities (who are often driven to flee to the city to escape rural poverty), and also working to build an effective coalition, raising awareness and campaigning for climate justice.

Speaker biography: Bishop Efraim Tendero, widely known as Bishop Ef, was appointed as Secretary General of the World Evangelical Alliance in early 2015. Previously, he served as National Director of the Philippine Council of Evangelical Churches (PCEC), 30,000 evangelical churches, for more than 20 years, and was also President of the Philippine Relief and Development Services (PHILRADS) which works with local churches to serve the poor and needy. He has been active in engaging with Government, including as a mediator in the peace process with Moro rebels, and in mobilising faith groups on Climate Change. Bishop Tendero has a BA in Theology from Febias College of Bible and a Master of Divinity with focus on pastoral counselling from Trinity Evangelical Divinity School, as well as three honorary Doctorates. Bishop Tendero and his wife Sierry have four children and two grandchildren.

Rachel Hauser was born and raised in Switzerland and has lived and served Christ in poor communities of Manila for 20 years through the international group SERVANTS.

Speaker 6: 17:00-17:15

Lowell Bliss and Kuki Rokhum

Director of Eden Vigil / Director - Training and Mobilisation, EFICOR

Title: The Lausanne Movement and Climate Change: Cape Town Commitment, Jamaica Call to Action, and Global Campaign

Abstract: A brief report from the Lausanne Movement will explain how evangelical Christians are being mobilized to respond to the climate crisis. The Cape Town Commitment proclaimed the challenge, the Jamaica Creation Care Call to Action defined it, and now regional conferences – including one planned for Europe – are implementing local and practical action.

Biography: Lowell Bliss serves the international climate coordination of the Lausanne Creation Care Network, and chaired the writing team of the Jamaica Creation Call to Action. A church-planting missionary for fourteen years in India and Pakistan, Lowell is now the director of Eden Vigil and the author of *Environmental Missions: Planting Churches and Trees*. He and his wife, Canadian Robynn Bliss, live with their three children in the tall grass prairie ecosystem of Kansas, USA.

Lalbiakhlui Rokhum – more popularly known as Kuki – is currently the Director – Training and Mobilisation of EFICOR (Evangelical Fellowship of India Commission on Relief – an Indian Christian relief, development and training organization) where she has worked since 2002. Kuki is passionate about issues of justice and is involved in teaching about issues such as HIV and AIDS and creation care and climate change. She has also been involved in the Micah Challenge campaign in India.

Plenary session with all speakers: 17:15-18:00

Dinner break

Welcome: 19:30-20:00

Speaker 7: 20:00-20:45

Bishop Efraim Tendero

Secretary General, World Evangelical Alliance

Title: The Gospel and the Climate: Climate Change as a Global Issue for Evangelicals

Abstract: We must challenge the false perception that evangelical Christians care only about spiritual and 'other-worldly' matters. God calls us to care both for the poor and the planet – God's good creation. Climate Change is a daily reality for millions of the world's poor, and it is a matter of faithful discipleship, of justice, and of worshipping Jesus as Lord, to ensure a healthy climate for future generations and our fellow creatures. God is calling us to respond!

Speaker biography: Bishop Efraim Tendero, widely known as Bishop Ef, was appointed as Secretary General of the World Evangelical Alliance in early 2015. Previously, he served as National Director of the Philippine Council of Evangelical Churches (PCEC), 30,000 evangelical churches, for more than 20 years, and was also President of the Philippine Relief and Development Services (PHILRADS) which works with local churches to serve the poor and needy. He has been active in engaging with Government, including as a mediator in the peace process with Moro rebels, and in mobilising faith groups on Climate Change. Bishop Tendero has a BA in Theology from Febias College of Bible and a Master of Divinity with focus on pastoral counselling from Trinity Evangelical Divinity School, as well as three honorary Doctorates. Bishop Tendero and his wife Sierry have four children and two grandchildren.

Speaker 8: 20:45-21:30

Dr Katharine Hayhoe

Director of the Climate Science Center, Texas Tech University

Title: A Climate for Change

Abstract: Climate is changing because of our actions, therefore our choices matter. We can choose to lessen our impact on the climate and to adapt to the effects such as drought, rising sea levels, and storms of increasing intensity. We can also choose the degree to which we will suffer.

But how do we determine, for example, where to go with these choices, what is too much suffering, what is enough mitigation? The science does not answer those questions.

When people talk about climate solutions, they tend to use words that raise fear in people. Fear about change, about economic hardship, about taxes. But this is where faith and values come in. In the Bible we have Jesus's call to love our neighbour in all aspects of life. We should use love to consider how our actions are impacting other people, and then move forward not in fear, but in power – recognizing that we can accomplish great things.

Speaker biography: Katharine Hayhoe: climate scientist, communicator, educator and evangelical Christian. She received a degree in physics and astronomy from the University of Toronto, and her masters' and PhD in atmospheric science from the University of Illinois at Urbana–Champaign. She is an atmospheric scientist and associate professor of political science at Texas Tech University, where she is director of the Climate Science Center. She has authored more than 60 peer–reviewed publications, and wrote the book *A Climate for Change: Global Warming Facts for Faith–Based Decisions* together with her husband, Andrew Farley. She also co–authored some reports for the US Global Change Research Program, as well as some National Academy of Sciences reports, including the 3rd National Climate Assessment, released on May 6, 2014. She has also served as an expert reviewer for the Intergovernmental Panel on Climate Change's Fourth Assessment Report.

Plenary session: 21:30-22:00

Benediction and close: 22:00
